💼Professional Summary

Detail-oriented and analytical professional transitioning into data science with over 7 years of experience in logistics, transportation, and sales across top companies including Almarai, Bob Morgan Security, and Wekalamba Logistics. Demonstrates strong problem-solving, communication, and data recording skills, with recent experience in Python, SQL, and machine learning. Passionate about using data to drive decision-making and business performance.

⚙️Skills

Programming: Python (pandas, NumPy, scikit-learn), SQL, Excel\ **Data Analysis**: Data Cleaning, EDA, Feature Engineering\ **Machine Learning**: Regression, Classification, Time Series Forecasting\ **Visualization**: Matplotlib, Seaborn, Power BI, Streamlit\ **Tools**: Jupyter, Git, Google Sheets, Microsoft Excel\ **Soft Skills**: Teamwork, Communication, Decision Support, Adaptability

---

📚Projects

[**Stocks Forecasting Time Series**](#) - Built and deployed a stock price prediction model using ARIMA/ SARIMA models. - Performed trend analysis and deployed an interactive Streamlit dashboard. - Tools used: Python, pandas, matplotlib, seaborn.

[**Customer Churn Prediction**](#) - Trained and evaluated classification models (Logistic Regression, Decision Trees, Random Forest) to predict customer churn. - Emphasized data preprocessing, feature engineering, and visualization.

[**Movie Recommendation System**](#) - Developed a recommendation engine using content-based and collaborative filtering. - Used cosine similarity and pandas to suggest personalized movies. - Evaluated model output using relevance metrics.

💼Work Experience

Almarai Company – Assistant Salesman\ *Apr 2024 – Present*

- Tracked sales, stock, and customer behavior patterns to support route planning and demand forecasting.
- Provided data input into Excel sheets and internal systems for decision-making.
- Collaborated with sales and logistics teams to ensure product delivery and customer satisfaction.

Wekalamba Logistics – Transit Driver\ *Oct 2022 – Present*

- Logged vehicle performance data and optimized routes for fuel and time efficiency.
- Maintained detailed records of mileage, repairs, and service schedules using Excel.
- Proposed improvements based on daily trip analysis and vehicle reports.

Bob Morgan Security Services – Driver\ *Mar 2020 – Mar 2022*

- Tracked and reported usage and incidents for K9 transport vehicles.
- Identified driving patterns that reduced fuel costs and improved response times.
- Assisted operations by documenting service needs and coordinating emergency logistics.

Hue Experiential Agency – Driver\ *Jun 2017 – Jan 2020*

- Recorded fuel and mileage logs, tracked delivery performance in spreadsheets.
- Delivered promotional and event goods while ensuring route and delivery data were accurately maintained.
- Provided Excel-based weekly reports to supervisors.

🎓Education & Training

Muindi Mbingu Secondary School\ *Feb 2010 – Nov 2013*\ High School Certificate\ Grade: B- (minus)

Moringa School (Data Science Bootcamp)\ *Nov 2024 – Aug 2025*\ Intensive data science program covering Python, SQL, machine learning, and deployment tools.

- Python for Data Science (e.g., DataCamp / Coursera / Moringa)
- SQL for Data Analysis
- Machine Learning Foundations

Additional Training

- Basic First Aid & Safety Certification
- Defensive Driving Course
